Round or Square Rod For Door Seam Security

FIG. 30E

In one modality the round wire, or flat metal and security switch are molded into, or coated with a plastic covering to form a square or round rod and placed or formed into a receiving groove to make a security seal around an access door like the one shown for PFN secure box in Fig. 2 .

FIG. 30G

FIG. 30F

The other modality displays the security seal system embedded in a plastic package wall for latter activation to open the package.
